PROBLEM 1-1 (1/1 point)

For each of the following questions, answer True or False:

After a mutable object has been created, its value can change.

☒ True 

☐ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-2 (1/1 point)

A program that keeps running and does not stop is an example of a syntax error.

☐ True

☒ False 

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-3 (1/1 point)

Given two Python programs that produce the same output for the same input, the program with fewer lines of code always executes faster.

☐ True

☒ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-4 (1/1 point)

A tuple can contain a list as an element.

☒ True

☐ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-5 (1/1 point)

If we define `myDict = {}`, then `myDict[('a', 'b')] = 'foo'` is a legal Python expression.

☒ True

☐ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-6 (1/1 point)

If we define `myDict = {}`, then `myDict[['a', 'b']] = 'foo'` is a legal Python expression.

☐ True

☒ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-7 (1/1 point)

Integration testing should usually be done before unit testing.

☐ True

☒ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-8 (1 point possible)

Any number that can be represented as a decimal fraction can be represented exactly in floating point representation in Python.

- ☒ True 
- ☐ False

Show Answer

You have used 1 of 1 submissions

PROBLEM 1-9 (1 point possible)

The body of a `while` loop can contain at most one "break" statement and at most one "pass" statement.

- ☒ True 
- ☐ False

Show Answer

You have used 1 of 1 submissions

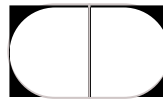

PROBLEM 1-10 (1/1 point)

A recursive algorithm must always have a base case.

- ☒ True 
- ☐ False

Show Answer

You have used 1 of 1 submissions

EdX offers interactive online classes and MOOCs from the world's best universities. Online courses from MITx, HarvardX, BerkeleyX, UTx and many other universities. Topics include biology, business, chemistry, computer science, economics, finance, electronics, engineering, food and nutrition, history, humanities, law, literature, math, medicine, music, philosophy, physics, science, statistics and more. EdX is a non-profit online initiative created by founding partners Harvard and MIT.
